

**Summer 2017**

**Hello Honors Geometry Students and Parents!**

Welcome to Greenway High School, and if your student is a returning sophomore I extend the same welcome to you!

Your student is planning to be enrolled in Honors Geometry this coming school year and there is a summer assignment for this course to ensure proper preparation. All students registered for this course should have taken Honors Algebra 1 and earned an A in that course. Of course, we realize that some students may become a little rusty on a couple concepts over the summer, so please find attached a review packet titled "Algebra 1 Review, 2016 Summer Assignment". Please have your student print out the packet, work through the material and freshmen need to be prepared to take a skills assessment pretest during walk-through registration at the end of July. Returning sophomores' prerequisite math grades will have been verified over the summer, and all students will turn in the packet to their math teacher on the first day of school.

Due to the sequencing and pacing of honors math courses, students are expected to be highly competent in approximately 85% of the material on the packet; if they find they struggle with completing the attached material easily, or perform poorly on the pretest, we will enroll your freshman student in either Regular Algebra 1 or Honors Algebra 1 this year. Your student has the opportunity to return to this Honors Geometry class next year as a sophomore.

They may use a calculator on any portion of the review they wish, and they will be allowed to use their calculators on the pretest as well; please help them to remember to bring it, as calculators will not be provided for the pretest.

I look forward to meeting your students in July!

Warm regards,

Olivia Braun
