

## With You

You know how I feel  
When I say this is real  
You know that this love is true  
When it comes to me and you

I love when you're around  
So I can sleep without a sound  
But as soon as you go away  
The nightmares come out to play

But when I am in your arms  
I know there can be no harm  
Because as long as I am with you  
All my good dreams will come true

Other people can easily see  
How we are so meant to be  
From the smiles on each of our face  
To how both our hearts race

You know how I feel  
When I say this is real  
You know this love is true  
When it comes to me and you
